Re: *Petition to Convene a Contested Case Proceeding to Establish Permanent Prices
for Interconnection and Unbundled Network Elements*
Docket No. 97-01262

Dear Mr. Waddell:

Please find attached to this letter a list of proposed recurring UNE prices in response to the March 23, 2000, information request from the TRA in this proceeding. However, please note that the attached list does not reflect the majority of the revisions and prices proposed by AT&T and MCI WorldCom in their January 20, 2000, and February 18, 2000, comments addressing the revised cost studies BellSouth filed on December 1, 1999. The format of the attached list, as provided by the TRA on March 23, 2000, only sets forth recurring rate elements for discrete UNEs and contains no recurring rate elements for UNE combinations. The majority of the issues addressed by AT&T and MCI WorldCom in their comments, however, pertain to recurring prices for UNE combinations. In BellSouth's cost studies, the recurring price of a UNE combination can not be calculated by simply adding together the prices of the discrete elements which comprise the combination. Thus, without waiving any arguments with respect the provision of discrete loops, the arguments set forth by AT&T and MCI WorldCom in their comments addressing the issues of 100% IDLC, BellSouth's DLC material costs, and GR-303 pertain to the provision of loops in combination with switching and the appropriate recurring rates for such loop-switching combinations.

The issue of the contract burial and installation costs associated with a 100 foot drop length affects the recurring price of discrete loops as well the recurring price of the loop-

POSTED
3-31-00

switching combination, which AT&T has indicated on the attached list in the highlighted sections with respect to discrete loops. Similarly, the issue of separate prices for vertical features affects the recurring price of switching as a discrete element as well as the recurring price of loop-switching combinations, which AT&T also has indicated on the attached list in the highlighted sections with respect to switching as a discrete element. The issue of OSS recovery also affects the recurring prices of discrete elements as well as the recurring prices of UNE combinations; however, AT&T and WorldCom have not been able to adjust BellSouth's cost studies to account for their concern on this issue. The recurring UNE prices on the attached list thus do not reflect any adjustment corresponding to the comments of AT&T and MCI WorldCom concerning the amount BellSouth has included in its recurring rates for OSS recovery. It does, however, reflect a change in the separate flat rate for OSS recovery to \$0.00 to reflect the TRA's decision that OSS recovery should be included in the recurring rates for all UNEs (a similar change must also be made to the non-recurring rate of \$2.76 that BellSouth included in its December 1, 1999, filing for OSS recovery).¹

In their January 20th comments, AT&T and MCI WorldCom identified as best they could the cost study adjustments and proposed recurring rates associated with UNE combinations. Thus, AT&T and WorldCom identified a recurring rate of \$11.05 for the 2-wire loop-switching combination. Throughout their comments, AT&T and MCI WorldCom also identified the impact of the various adjustments on the recurring rates of other loop-switching combinations. Summing those adjustments produces the following additional loop-switching rates:

2-wire loop with 2-wire DID trunk port:	\$13.71
2-wire ISDN digital grade loop with 2-wire ISDN digital line side port:	\$14.34

Even these rates, however, reflect only the adjustments AT&T and MCI WorldCom were able to calculate. As set forth in footnote 6 of the comments filed on January 20th, AT&T and MCI WorldCom were unable to determine appropriate adjustments to BellSouth's switching studies to account for GR-303 in the recurring rates for loop-switching combinations.

If the TRA or Staff have further questions concerning these issues and the appropriate adjustments to the cost studies, AT&T suggests that it would be appropriate to convene an informal conference at which they may be discussed.

Sincerely,

Jim Lamoureux 

Encls.

cc: Richard Collier, Esq.

¹ Please note that AT&T has only identified the recurring rate for each discrete UNE, pursuant to the title of the chart attached to the information request.

	Unit	AT&T Proposed Rate	Telric Calculator	Price Difference Telric-HAI	Source/adjustment
A.0	UNBUNDLED LOCAL LOOP				
A.1	2-WIRE ANALOG VOICE GRADE LOOP
